Answers. 1. If I were you, I wouldn't do this. 2. If you mix red and green, you get yellow. 3. If I had known the answer, I would have told you. 4. Unless you start now, you will be late. 5. If I were you, I would never do / would never have done this. 6. Provided that you get there half an hour earlier, you will be able to get straight in. 7. Unless you stop smoking, you will develop ...

Mixed Conditionals Exercise - English Grammar

Solution: From the above problems, we know that one liter of this solution contains 11.6 mol of ethanol in $(893.7 - 536.2) = 357.5$ g of water. The molarity of ethanol in the solution is therefore $(11.6 \text{ mol}) / (0.3575 \text{ kg}) = 32.4 \text{ mol kg}^{-1}$. 4 Colligative properties: escaping tendency of the solvent

solutions - Chem1

Calculating the concentration of a chemical solution is a basic skill all students of chemistry must develop early in their studies. What is concentration? Concentration refers to the amount of solute that is dissolved in a solvent. We normally think of a solute as a solid that is added to a solvent (e.g., adding table salt to water), but the solute could easily exist in another phase.

Calculating Concentrations with Units and Dilutions

The solution particles are closer together. The solution on the right is more dilute (less concentrated). (CC-SA-BY-3.0 Tracy Poulsen). A concentrated solution is one in which there is a large amount of solute in a given amount of solvent. A dilute solution is one in which there is a small amount of solute in a given amount of solvent. A dilute ...
