Commodore Monitors Manual

The Commodore PET is a line of personal computers produced starting in 1977 by Commodore International. A single all-in-one case combines a MOS Technology 6502 microprocessor, Commodore BASIC in read-only memory, keyboard, computer monitor, and, in early models, a cassette deck.. Development of the system began in 1976 and a prototype was demonstrated at the January 1977 Consumer Electronics Show.

Commodore PET - Wikipedia

The Commodore 128, also known as the C128, C-128, C= 128, is the last 8-bit home computer that was commercially released by Commodore Business Machines (CBM). Introduced in January 1985 at the CES in Las Vegas, it appeared three years after its predecessor, the bestselling Commodore 64.. The C128 is a significantly expanded successor to the C64, with nearly full compatibility.

The torque sensor monitors the amount of force applied by the steering wheel. This signal is fed into the EPAS factory ECU where the motor delivers the appropriate amount of assistance to power the steering rack or box. Benefits. Small compact units, requiring only a battery connection to work. No messy hydraulic connections or systems to bleed.
