Actuating materials hold a promise for
fast-spreading applications in smart
structures and active control systems,
and have attracted extensive attention
from scientists of both mechanics and
materials sciences communities.

This work brings together previously unpublished notes contributed by participants of the IUTAM Symposium on Hamiltonian Dynamics, Vortex Structures, Turbulence (Moscow, 25-30 August 2006). The study of vortex motion is of great interest to fluid and gas dynamics: since all real flows are vortical i...
