The router or MW325R, or device mentioned in this User Guide stands for MW325R 300Mbps Enhanced Wireless N Router without any explanations. Parameters provided in the pictures are just references for setting up the product, which may differ from the actual situation.

MW325R 300Mbps Enhanced Wireless N Router

Mercury source files must be named '*.m'. Each Mercury source file should contain a single Mercury module whose module name should be (although it does not have to be) the same as the filename without the '.m' extension. The Mercury implementation uses a variety of intermediate files, which are described below.

The Mercury User's Guide

How to log into the web-based interface of the MERCUSYS Wireless Router. Note: Though possible, it is not recommended to attempt this process over Wi-Fi. Step 2. Go to Network>LAN Settings on the side menu, choose Manual and change the LAN IP address of your MERCUSYS N router to an IP address on the same segment of the main router. This IP address should be outside of the main router's DHCP range.
