Silverlight and Sky Go - Microsoft Community

It uses ASP .NET pages to host the Silverlight plug-in and there is discussion of many issues relating to ASP .NET, but this is essentially about how to build a web application in Silverlight. This means that you are going to be using technologies that you might well be familiar with from desktop .NET application development - which is of course the whole point of using Silverlight.

Silverlight 4: Problem - Design - Solution

Problem one: My dough isn't rising. Luis' solution: A lot of people think dough won't rise unless they leave it for several hours and leave it somewhere really warm. Really, you don't need anything special to make dough rise. I always use instant yeast as it's the most reliable, then normal cold water (if you use tepid water make sure to knead the dough for 10 minutes by hand or six ...
