Like its predecessors, this third edition of
The Fungal Community is a hefty wide-
ranging compendium of information
about fungus ecology, but now with a
new set of editors. The Rutgers
University team of Dighton, White, and
Oudemans has taken over for Donald
Wicklowsky and George Carroll, who ably
produced editions 1 (1981) and 2
(1992).

Dighton, J. (2017) Fungal degradation of our cultural heritage In: The Fungal Community: its Organization and Role in the Ecosystem. 4th Edition, ed. J. Dighton and J.W. White Jr., CRC Taylor and Francis pp. 501-508.

Publications - Pinelands Field Station

Linear mixed effects models were also used to determine if variation in soil abiotic factors was associated with changes in fungal richness at both the community and fungal group levels. Tree mortality, soil nutrients, moisture, and phenolics were included as fixed factors and had low levels of collinearity (Table S3).
